HIGHLIGHTS 1H 16

Take-up becoming more selective

- > Almost 60% of take-up in City Center
- > Highest traction in Class A & B+ buildings
- > Decreasing vacancy, especially in CBD
- > Lack of future supply as main driver for the market

Prime Rents benefit from strong fundamentals

Total market take-up weaker than 2015, CBD remains solid

- > CBD and City Center remain strong markets
- > Product quality & location gain momentum as key drivers
- > Obsolescence of CBD stock as source for opportunities

Rents for Grade A buildings in CBD with positive momentum: decreasing incentives and ongoing increase in facial rents

Significant increase of take up

- > Decreasing vacancy in CBD – lowest since 2008
- > Scarcity of high quality product pushing prime rents
 1. Availability of high quality product at 10 year low
 2. Decrease of rent incentives in CBD
 3. Increase of facial rents ongoing

(1) Availability in sq m
 (2) Inside M-30
 (3) The take-up and vacancy details correspond to 1Q2016 (2Q 2016 detailed figures still to be published by brokers)

Investment markets 2016 remain strong, but below 2015 due to the lack of product

- > General market volatility increases “flight to quality”
- > Increasing importance of rental growth for further capital value growth
- > Spread vs reference rates remain at very attractive levels
